Percent of adults who have had a routine checkup in the past year has increased more than 10% over the past 5 years

Source: 2018 Missouri Behavioral Risk Factor Survey.

The BRFSS is a state-based health survey that annually collects information on health conditions, behaviors, preventive practices, and access to health care. BRFSS data are used to identify emerging health problems, establish health objectives and track their progress, and develop and evaluate public health policies and programs to address identified problems.
